

Kod szkolenia: **BPT120**

Tytuł szkolenia: **Business Process Testing 11.0 Essentials**

Dni: 3

## Opis:

You will learn the process of creating BPT components and tests using both QuickTest professional and Quality Center. You will also study how to create and manage BPT application areas, object repositories, keywords, functions and scripted components. Best practices for the implementation of BPT automation are stressed throughout the course. All topics are supported by hands-on exercises designed to provide you with the ability to successfully automate using the BPT methodology.

This course is for Test Automation Engineers and Subject Matter Experts who will be using QuickTest Professional and Quality Center to implement automation in a Business Process Testing environment.

This course covers Software versions 11.0

The hands-on labs are currently using software version 11.0
