

Kod szkolenia: **OMU140**

Tytuł szkolenia: **Operations Manager 9.x on UNIX / Linux Operators**

Dni: 2

Opis:

This 2-day instructor led course covers the skills needed to use Operations Manager on UNIX or Linux to manage systems and applications in a heterogeneous computing environment. While the focus of the course is operators of Operations Manager, others who are interested in an introductory look at the product can also benefit. The course covers specific procedures necessary to process messages originating from application or system errors and provides a hands-on labs experience using Operations Manager on Linux. The emphasis is on the Java Operator GUI for these tasks. The hands-on labs use version 9.10 of the software.

This course is designed for users who are new to Operations Manager.

Versions 9.0, 9.01, & 9.10
