

Kod szkolenia: **OMI110**

Tytuł szkolenia: **Operations Manager i Software 9.x for Operators**

Dni: 2

Opis:

This 2-day entry-level, instructor-led course covers the skills needed by operations staff to manage events in a heterogeneous computing environment using Operations Manager i Software (OMi), a best-in-class service operations solution. While the focus of the course is on the OMi skills needed by operations staff, others who are interested in an introduction to OMi will also benefit. The course covers specific procedures necessary to own and act on events received by OMi and provides a hands-on lab experience using OMi version 9.2.

Software Version 9.0 - 9.2
