

Kod szkolenia: **CSA120**

Tytuł szkolenia: **Cloud Service Automation 3.2 Essentials**

Dni: 4

Opis:

This four-day course introduces students to the essential concepts and use of the HP Cloud Service Automation (CSA) software.

HP Cloud Service Automation software offers open, extensible lifecycle management for customers who want to deploy a private cloud or a hybrid cloud.

HP CSA is a unique platform that orchestrates the deployment of computer and infrastructure resources and of complex multi-tier application architectures. HP CSA integrates and leverages the strengths of several HP datacenter management and automation products, adding resource management, service offering design, and a customer portal to create a comprehensive service automation solution.

The course consists of task-oriented lectures, and a series of detailed hands-on labs to teach the course material to the student. The hands-on labs use version 3.2 of the software.

Software Versions: 3.2
