

Kod szkolenia: **00350**

Tytuł szkolenia: **Operations Orchestration 9.x Intermediate and Advanced Authoring**

Dni: 2

Opis:

In the Intermediate and Advanced Authoring course you will become familiar with all aspects of authoring within Operations Orchestration 9.00. In this course you will learn how to:

- Author new operations to perform various tasks in your flows
- Incorporate subflows to simplify flow design
- Extract data from complex output using filters
- Use looping and iteration, control access to objects in the repository
- Persist data across flow runs
- Practice many advanced flow development techniques that will prepare you for working on a variety of Operations Orchestration deployments

The course consists of focused, task-oriented lectures and detailed hands-on labs. This is the Intermediate and Advanced course for Operations Orchestration.

This course covers Software versions 9.0

The hands-on labs are currently using software version 9.0
